

Overview:

This two-day event will provide attendees with an up-to-date overview of the latest advances in head and neck cancer treatment from leading medical, surgical and rehabilitation specialists.

The speech and language therapy and wider AHP team will provide insights into person-centred rehabilitation across the care pathway, including surgery, radiotherapy, systemic therapies and in the context of recurrent disease. Patient experts will share their experience throughout the programme.

Audience:

This event is open to anyone involved in the care of people diagnosed with head and neck cancer, including allied health professionals, nurses, dental specialists and ENT, maxillofacial and oncology trainees.

Sponsors:

The above sponsors provided funding for the study day, but they have had no input into the programme, selection of speakers or topics.
